Reasons for Allowance

1. Claims 1-41, and 43 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The cited prior art taken alone or in combination fails to teach the claims of the invention which involves the computer implementation of methodology to identify a problem statement such that a complexity module can interpret such problem and set forth configuration parameters to a solving module that has quantitative features involving solution behavior, need for iteration and solution determination such that if the desired result is not consistent with the configuration parameters, then the complexity module will execute an adaptation that includes changing the problem to a similar albeit intrinsically easier problem that can be solved within established time and asset constraints.

The closest prior art (Black, U.S. Patent 6,269,351) teaches a neural network, trained in relation to a set of input-output relationships wherein weights to various nodes are adjusted to minimize output error. Black adapts the rate of such learning but does not provide for changing the problem such that a solution can be reached within time and asset constraints.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
